

Protocol for Feeding Sam:

Solids:

Measure out 40g of a solid.

Have a spoon and Nuk brush.

Set timer for 15 seconds

Vent him! (see video) Keep attached for the first 2 bites.

Protocol:

- "Sam, here are the rules--I'm going to give you a bite, and say 'Sam, take your bite.' If you take your bite, I'll say 'Good job taking your bite!!'"
- Put a spoonful of solids on spoon, level out, and with the Nuk brush, begin about 3/4 of the way up the spoon. Scoop the food onto the Nuk.
- Say: "Sam, take your bite!"
- If he takes his bite, say "Good job taking your bite!"
- Begin 15-second timer.
- Continue until all of the food is gone.

Liquids:

Measure out 3g of Boost/Pediasure + 60g of formula.

Have Nosie ready.

Set timer for 22 seconds

Protocol:

- "Sam, here are the rules--I'm going to give you a drink, and say 'Sam, take your drink.' If you take your drink, I'll say 'Good job taking your drink!!'"
- Measure out 10cc of formula into syringe.
- Put 2cc of formula into Nosie.
- Say: "Sam, take your drink!"
- If he takes his drink, say "Good job taking your drink!"
- Begin 22-second timer.
- Continue until all of the drink is gone.

Running Sam's machine:

1. Attach his port, filled w/ water. Make sure port is clamped.
2. Turn on.
3. Press "rate/dose" and program your numbers.
4. Press "food type".
5. Unclamp his port.
6. Press "start."
